

The graph illustrates the species-area relationship for three island groups across seven different populations. The x-axis represents the population size, and the y-axis represents the number of species (S). The blue line (SAI) shows a strong positive correlation, the yellow line (GUA) shows a moderate positive correlation, and the red line (ROT) shows a weak positive correlation. All lines show an increase in species with increasing population, with SAI having the highest species count and ROT the lowest.

| Population | SAI (Blue) | GUA (Yellow) | ROT (Red) |
|------------|------------|--------------|-----------|
| SAI        | ~10        | ~8           | ~2        |
| GUA        | ~15        | ~10          | ~3        |
| ROT        | ~16        | ~12          | ~4        |
| NSW        | ~15        | ~13          | ~5        |
| QLD        | ~20        | ~14          | ~4        |
| HAW        | ~22        | ~16          | ~6        |
| NAM        | ~28        | ~18          | ~8        |

The chart displays the number of nodes in the population for three different models (Blue, Yellow, Red) across ten datasets (FLA, VAT, KOD, KOC, GAS, TJB, STY, NYC, RAM, TAN). The Y-axis represents the number of nodes, ranging from 0 to 100. The X-axis lists the datasets. The Blue model consistently has the highest number of nodes, followed by the Yellow model, and then the Red model. The Red model's node count is generally low, often dropping to zero for some datasets like KOC and STY.

| Dataset | Blue Model (Nodes) | Yellow Model (Nodes) | Red Model (Nodes) |
|---------|--------------------|----------------------|-------------------|
| FLA     | 45                 | 15                   | 5                 |
| VAT     | 48                 | 15                   | 5                 |
| KOD     | 35                 | 15                   | 5                 |
| KOC     | 15                 | 15                   | 5                 |
| GAS     | 55                 | 18                   | 5                 |
| TJB     | 75                 | 20                   | 5                 |
| STY     | 35                 | 20                   | 5                 |
| NYC     | 95                 | 25                   | 5                 |
| RAM     | 95                 | 30                   | 5                 |
| TAN     | 105                | 30                   | 5                 |
